*Modernization through
innovation, inspiration
and mutual learning*

**SCIENTIFIC FOUNDATION
NORDEN CENTRUM**

Ladies and Gentlemen,

Our think-tank established in 2011 in Warsaw is a Polish independent centre for research, training and analysis supporting the social modernization and regional dialogue in Central and Northern Europe.

We are especially interested in the exchange of best practices in public policies, business cooperation and international activity between Poland and five Nordic countries: Denmark, Finland, Iceland, Norway and Sweden.

The mission of our Foundation is to help to extend and disseminate knowledge about the specificities of the Nordic model of development, its latest achievements and its recalibration in the face of contemporary challenges.

We direct our activity to experts and opinion leaders, business partners and public authorities. I invite you to various forms of cooperation and participation in our projects.

*Professor Dr. Włodzimierz Aniot
President of the Scientific Foundation
NORDEN CENTRUM*

The thematic scope of our projects relates to the following 10 key areas of interest:

- specificity, evolution and perspectives of Nordic development model;
- family and gender policy, gender equality rights;
- labour market policy, industrial relations, social dialogue;
- migration policy, integration of immigrants;
- education and innovation policy, research and development, knowledge-based society;
- sustainable development, environmental protection, climate and energy policy;
- corporate social responsibility (CSR), corporate and business culture;
- European integration, cooperation in the Baltic-Nordic region;
- international development cooperation, humanitarian assistance, peace diplomacy;
- transnational diffusion processes, transfer of foreign experience and social innovations to different countries.

The Foundation reaches its goals through initiation, realization and support of:

- research projects and scientific conferences, seminars, reports and analyses;
- educational programmes, trainings, workshops, debates, consulting services, study visits;
- cultural events, exhibitions, promotion initiatives;
- voluntary and paid public tasks.

We cooperate with Polish and foreign, mostly Scandinavian, academic and research institutions, public administration bodies, including local authorities, companies, chambers of commerce, business clubs, NGOs and media. These partners include e.g. the Baltic University Programme, ESPAnet, International Development Norway, Svensk-Polska Handelskammaren, Polish Ministry of Foreign Affairs. The eminent scholars from Uppsala, Bergen and Berlin universities are among the members of our Advisory Committee.

The Foundation offers various forms of expertise, consultancy and training services, by utilizing the knowledge and experience of its experts and associates – both researchers and trainers representing various disciplines of social sciences (political science, economics, sociology, Scandinavian studies, law, international relations), and related professionals from business, public administration and diplomacy.

We offer preparation of professional analyses and reports, organization of trainings, seminars and conferences, as well as assistance in establishing international contacts, with particular emphasis on partners from the Nordic countries. According to individual needs and orders, the Foundation also runs courses of Scandinavian languages from basic to a specialist level (adapted to the specific requirements).
